

handle_custom_lossless
_packet

```
graph LR; A[handle_custom_lossless_packet] --> B[friend_not_valid]
```

A diagram showing a call to the function `handle_custom_lossless_packet`. The function name is written in a gray box on the left. A blue arrow points from this box to a white box on the right, which contains the text `friend_not_valid`. This indicates that the function call results in an error or an invalid state.
